

LAMIFLEX
GROUP

iTube – wrapping system for the tube, bar and profile industry Fast, effective and robust

iTube packaging system

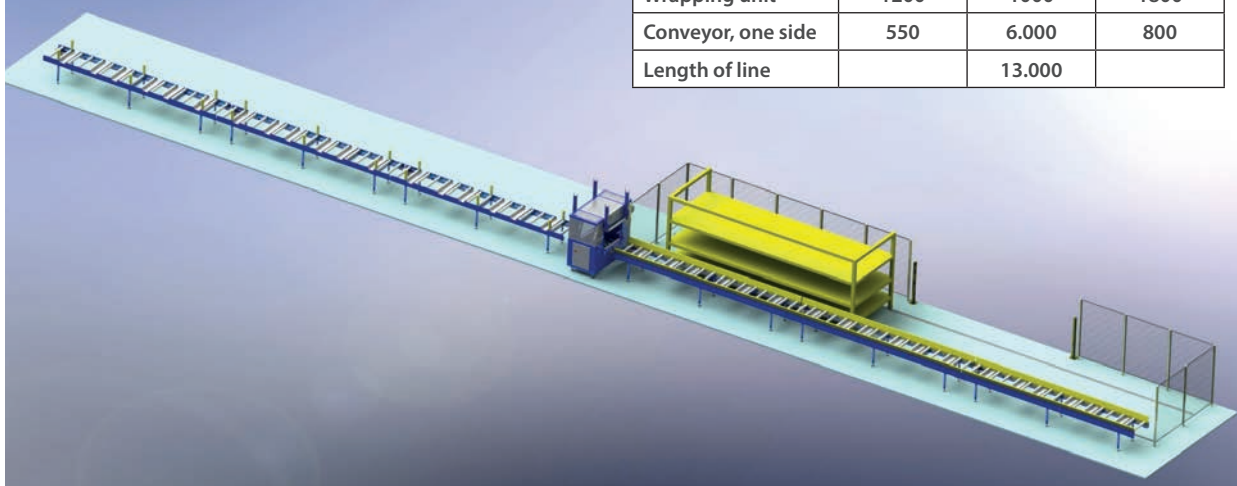

a complete packaging solution

- Allowing you to pack individually compiled bundles of tubes, profiles as well as plates, depending on customer wishes.
- Single source supply – Lamiflex is responsible for providing materials, machinery and maintenance support.
- Different financial solutions possible. Ask your local Lamiflex representative.

Complete packaging line

Lamiflex can offer a complete solution including storage handling and packing with other material such as the product Lamiflex, PET-strapping etc.

Example

Main Dimensions

	Width [mm]	Length [mm]	Height [mm]
Wrapping unit	1200	1000	1800
Conveyor, one side	550	6.000	800
Length of line		13.000	

iTube Packaging System

iTube is the semi-automatic wrapping machine for tubes, bars, profiles and other long goods. Also for plates up to a width of 1200 mm.

The wrapping unit can be completed with different types of conveyers such as roller-, lamella- or belt conveyers for different lengths. Automatic start of the wrapping process as well as automatic film cutting is an option.

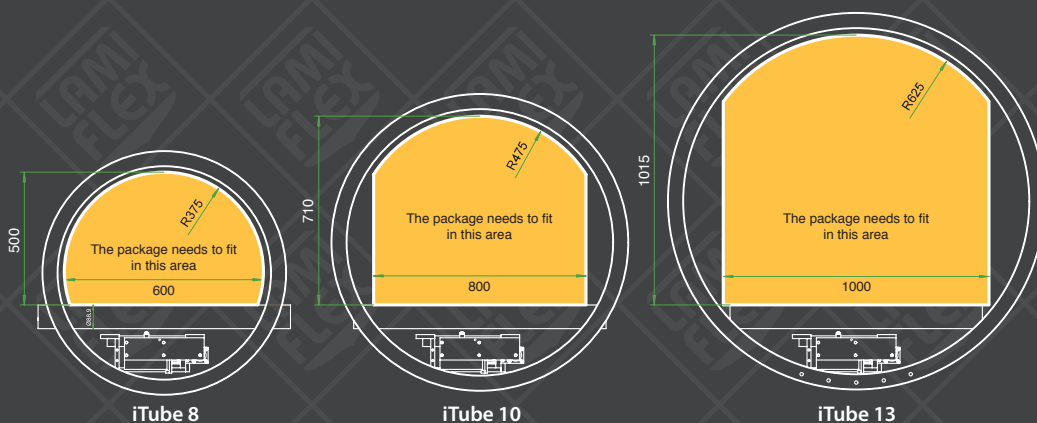

A plastic film applicator to close the entry and the exit of the bundle is also a possible option. The operations are controlled by a standard control panel or a touch screen.

The iTube system is very easy to install and can be put into use in a matter of hours.

iTube

Model	Max packet size
iTube 8	600 x 500 mm
iTube 10	800 x 710 mm
iTube 13	1000 x 1015 mm
